DECLARATION OF CONFORMITY
for plastic material used in contact with foodstuffs

Supplied by:
Schlachthausfreund GmbH
Wacholderweg 7-9
D-21256 Handeloh-Höckel

We declare herewith that the following product manufactured by us:

ARTICLE TYPE: butchers aprons Type ISCHÜ

ARTICLE PART-NO.: 1000 - 1021

MATERIAL: polyester woven material, pressure-coated on both sides with nitril rubber

conform to the requirements of the German law concerning articles of everyday use and/or the corresponding European regulations concerning plastics and the regulations (EU) 10/2011, 2023/2006 (GMP) and (EU) 1935/2004 in their current versions and are manufactured in accordance with the European Community regulations for Norm CE-EN 1082 and 412 and correspond to the requirements of the Law governing Foodstuffs and Utility Items.
Under the conditions of use as defined in the specifications, the total migration as well as the specific migration are below the legal limit defined by Regulation (EU) 10/2011.

Insofar as the products contain restricted substances (SML/QM), the quantities are within the limits defined by Regulation (EU) 10/2011. Substances which are not mentioned in the Union List (Appendix I of the Regulation (EU) 10/2011) remain subject to national regulations e.g. the BfR recommendations

The materials and raw products used in manufacture correspond to the German law concerning articles of everyday use and/or the corresponding European Guidelines for plastics 2002/72/EG ff..
As defined in these regulations, all our aprons are of first quality and permitted for use in the meat and food processing industry. Since mid-2006 they are also resistant to lactic acid and all acids, enzymes and other substance used in milk processing and cheese manufacture, which previously caused discoloration in the apron material.

They are spongeable, permanently flexible, will not break and are resistant to animal oils and fats. The vulcanized rubber coating remains stable at temperatures –30°C to +90°C in daily use and for short periods up to +100°C. Our aprons are therefore suitable for use in the food industry.

Specifications concerning intended usage or restrictions:

- Type(s) of foodstuffs with which the material MAY come into contact: wet and dry goods
- Type(s) of foodstuffs with which the material should NOT come into contact: not known
- Length of time and temperature for treatment and storage conditions in the case of contact with the foodstuff: under normal conditions, no limitations known

April 11, 2016

The production chain overview required under regulation (EG) Nr. 1935/2004 is guaranteed by the production date stamp or tag.

We further confirm that these products were not manufactured under exploitative working conditions as defined by the ILO Convention 182.
